PITANJA:

I Read the text carefully.

Why do women live longer than men?

Women generally live about six years longer than men. Evidence suggests that

boys are the weaker sex at birth, which means that more die in infancy. Also women do not have as much heart disease as men. In terms of lifestyle, men smoke more than women and thus more die of smoking – related diseases. They drink more and are more aggressive in behaviour, particularly when driving cars, so they are more likely to die in accidents. Also, they generally have more dangerous occupations, such as building work.

Historically, women died in childbirth and men in wars. Hence, nuns and philosophers often lived to great ages. Now, childbearing is less risky and there are fewer wars. The country with the highest life expectancy is Japan, where the average age for men is 76 and for women 82.

1. Write the explanations of the following words in English.

Infancy

Occupation

Nun

Childbearing

Lifestyle

2. Why do women live longer than men?
